EMP 400W

EPSON[®]
EXCEED YOUR VISION

Epson
EMP 400W

Enjoy a big picture even in a small meeting room with our ultra-short throw projector

The latest Epson EMP-400W is the ultra-short throw projector for interactive business presentations.

It is the ideal presentation partner for small to mid-sized meeting rooms. Easy to use and flexible, this projector allows big screen presentations even with a short projection distance. Enjoy multimedia at its best, give presentations without shadows and improve interaction with your audience.

Project without any shadows

Have more space during your meeting. This ultra-short-throw projector produces a sharp 60-inch picture at just 65 cm from the projection surface, and eliminates shadow effects caused by people and objects in front of the screen.

Make an impact with wide and powerful images

Displaying an original widescreen picture, the Epson EMP-400W innovates with automatic detection and resizing of any aspect ratio (4:3/16:10/16:9). More horizontal space allows you and your business partners to use a larger surface to project wide spreadsheets, presentations or corporate videos.

LAN Easy maintenance with network monitoring and control

The Epson EMP Monitor™ software enables you to configure and operate the projector remotely over your network. You can even set an e-mail alert for the inside temperature of your projector or monitor the lamp status in order to prevent any possible problems disrupting your presentations.

Environmentally friendly

The Epson EMP-400W is designed and produced in compliance with Epson's environmental standards. It allows you to display on a screen of up to 110 inches and consumes much less power than large flat-panel televisions. That means you can save both energy and costs.

This projector also boasts improved lamp life, a sleep timer function, paint-free design and recyclable packaging.

- **Minimise power consumption** when not in use thanks to timer functions and rapid power on/off.
- **Reduce pollution:** the packaging is 100% recyclable and our projectors are manufactured without any paint.
- **Enjoy clear visibility even in light meeting rooms with our E-TORL lamp.** Save money and energy - our low-wattage lamps last up to 4,000 hours.

Ideal for small and mid-sized meeting rooms

- **Ultra-short-throw lens**, only a small distance to the screen is necessary to project powerful images. It eliminates shadow effects and allows more space on the table.
- **Project a widescreen image** for more efficient meetings and increased compatibility with any laptop.
- **Bright, colourful images** with Epson 3LCD technology.
- **Easy maintenance** with network monitoring and control. The Epson EMP-400W enables employees and IT support staff to monitor and control the projector simply by entering its IP address into the Epson EMP Monitor™.
- **Improved security** with the inclusion of a tough security bar, Kensington lock connectivity and password protection.

Epson 400W EMP

Powerful built-in 10W speakers play any audio or video to your audience, without external speakers.

Easy maintenance with the Easy-Grab air filter and simple lamp change.

Ultra-short throw lens only a small distance is required between the projector and the screen. Thanks to the ultra-short throw projector, your presentation is free of shadows.
